Hi Norman **Ivermectin**

Ivermectin [Anti-viral and FDA approved] is vouched for as 100% effective in Covid proactive-protection, as well as in early, treatment, says the USA medic (Dr P Corrie? “who doesn’t want to do this again”).

Watch ""I CAN'T KEEP DOING THIS"": Doctor pleads for review of data during COVID-19 Senate hearing" on YouTube

This is a reference to Ivermectin a proven successful treatment for Covid -19 yet still ignored for ulterior purposes. What are these ulterior purposes and why? Editor

I remember well the **launch of Ivermectin**, which was indicated in the West African outbreak of a specific anthelmintic worm, which was in the drinking water and the worms migrated from the digestive tract into the eyes, and the patient became completely blind.

Ivermectin was taken as an eye ointment to kill the worms within the eye, and it worked very well, I remember that Merck gave, if my memory serves me well, something like US\$12 million to the various countries involved with this condition, and after about one year, they had resolved the condition completely.

The medic to whom you make reference, as I remember, was pretty fired up about why **Ivermectin**, a now proven successful treatment for the Covid-19 virus, seems to have forgotten that *the Pharmaceutical Mafia will not allow anything that will cure this so called Pandemic because they are in favour of the defeat of the western civilisation, and support Gates, Clinton, Soros et al, in their global objectives!*

The other treatment schedules such as; zinc, vitamin D, Vitamin C, hydrogen peroxide, etc, , have all been buried by the industry in order to protect their profits.

Kind regards,

Norman.
